

# Bin Handles

## Specification (of sample bin handles)

### Key Features:

- High Nickel Chrome plated
- Proportionally sized, shaped, and balanced
- Moulded loose plastic grip (if required)
- Perfectly grooved, notched, forged, or reverse bended
- Wide range of sized and shapes
- Excellent fitting
- Provision for specific design and development
- Computerized designing

### Technical Specifications:

#### • Handles for

- |                         |                       |
|-------------------------|-----------------------|
| 1. Buckets              | 2 to 30 Litres        |
| 2. Drums                | 30 to 150 Litres      |
| 3. Tubs                 | Up to 50 Litres       |
| 4. Containers / Baskets | As per specifications |

#### • Steel Wire Thickness

2.5 mm to 8 mm

#### • Coating / Plating

1. Strength Up to 7 microns
2. Type
  - Nickel/chrome plating
  - Powder coating (Up to 40 microns with different colors)
  - Galvanized

#### • Grippings

- Usage of high density plastic
- Different colors
- Different designs

## Our capabilities and investments

- Latest machines for automatic cutting and straightening
- Power pressing for notching, bending, forging, and reverse-bending
- Heavy-duty injection moulding machine for gripping
- Sophisticated electroplating plant consisting of latest transformers
- Packaging and quality control department
- Team of dedicated skilled manpower
- History of custom-made handles exported to countries in Africa, Europe, and the Middle East
